

.UK RESELLER POLICY

Policy effective from the 9th of February 2027

Policy Version: 2025-06

1. Introduction

- 1.1. This .UK Reseller Policy (**Policy**) governs Registrars' use of Resellers.
- 1.2. Any capitalised terms used but not defined in this Policy have the meaning given to them in the Registry-Registrar Base Agreement or other document comprising the .UK RRA.

2. Conditions applicable to use of Resellers

- 2.1. Registrars may use Resellers provided that they comply with the conditions set out in this Policy.
- 2.2. Registrars may not transfer, subcontract or delegate any of their rights or obligations under the .UK Registry-Registrar Agreement to Resellers or any other third parties.
- 2.3. As between Nominet and Registrars, Registrars are responsible for the information, service, marketing and advice Registrants are given, whether or not the Registrar deals with Registrants directly.
- 2.4. Nominet is not required to deal with or give any recognition or special privilege to any Reseller.
- 2.5. Any actions or omissions of a Registrar's Reseller may have a direct impact on that Registrar's compliance with the .UK Registry-Registrar Agreement and will be treated as the actions or omissions of the Registrar for the purposes of compliance with the .UK Registry-Registrar Agreement.
- 2.6. Registrars must make their Resellers aware of the .UK Registry-Registrar Agreement and Registry Policies and ensure that the way their Resellers deal with Registrants is compatible with the .UK Registry-Registrar Agreement and Registry Policies.
- 2.7. Registrars' contracts with Reseller(s) must be compatible with the terms of the .UK Registry-Registrar Agreement and Registry Policies.
- 2.8. Registrars must provide Nominet with copies of their contracts with Resellers or relevant excerpts of those contracts that relate to Domain registrations on Nominet's request.
- 2.9. Registrars must ensure that their Resellers provide them with all information relevant to Domain registrations for which they act as a Registrar to enable them to comply with their obligations under the .UK Registry-Registrar Agreement to keep Registration Data accurate and up to date. Any obligation under the .UK Registry-Registrar Agreement for the Registrar to do something because it becomes aware of a change in a Registrant's information or situation also applies where the Registrar's Reseller has become aware of a change in a Registrant's information or situation.
- 2.10. Registrars must confirm to Nominet whether a person or organisation is a Reseller or account holder controlling a Domain and provide Nominet with full contact details for them on Nominet's request.
